Learning Experience(s)

Talk to your child about the changes we see in the season of autumn and the effects it has on living things. What happens to the...

- weather/temperature/amount of sunlight?
- leaves on the trees?
- animals such as squirrels and hedgehogs?

This experience will help your child...

- share their learning with you
- take part in short conversations
- become aware of how routines and events in their world link with times and seasons
