

## P2 - Term 3

We are coming to the end of another busy term that has just flown by!

This term, primary 2 have been learning about weather and Scottish food and farming. This has involved food tasting, a visit to Gorgie City Farm, growing our own plants and making rain gauges.

We have learned where our food comes from, what plants need to grow, examined our food likes and dislikes and had a look at what grows and lives in Scotland. At Gorgie Farm we made butter from cream and felted wool too! We have enjoyed looking at food chains and thinking about food chains that exist in Scotland.

While learning about food, we have examined how to keep our bodies healthy. We know that we need a balance of lots of different types of food and must make sure we have good hygiene when handling food too.

We had a visit from Gary, a scientist from Napier University, who taught us all about hand hygiene, good and bad bacteria, and our immune systems.

We have particularly enjoyed developing our vocabulary by making up WOW words for fruit and veg. Some of our favourite WOW-words include juicy, crunchy, delicious and creamy.
