

Colinton Primary School Homework – Monday 16 March – Thursday 2 April 2020

Easter is approaching. Find out about an Easter tradition from a different part of the world and share your learning in a creative way. You could make a powerpoint, a poster or use an app like Pic Collage.

Have fun practising the 7x table!

<https://cdn.oxfordowl.co.uk/2013/08/13/10/07/08/177/7xTableMultiplicationBingo.pdf>

Use this link to find a set of cards and game boards to help you make a bingo game to practise the 7x table. (if you don't want to print you can copy idea.)

Read and follow instructions for doing something new – it could be making a model, following a recipe, playing a new game...

Discuss with someone in your family what you found easy or difficult.

Sticks and stones may make your bones!

Go outside and collect sticks and stones to make a model human skeleton. Tell your family the names of any bones you already know. If you can, take a photo of your model skeleton.

Colinton Counts

Our theme this time is **Number Bonds**. Encourage your child to experiment with calculating which two numbers can make 100.
Mild: eg $60 + ? = 100$ $? + 80 = 100$
Spicy: eg $45 + ? = 100$ $? + 27 = 100$ etc.
Hot: work with numbers to 1000 eg $230 + ? = 1000$

Use the internet or books to help you to find out about another **inspirational Scot**. (Some of the people we've learned about are Andrew Carnegie, Flora MacDonald, William Wallace, Andy Murray). Produce an A4 size fact sheet about your chosen person. You should include pictures and text. Can you find a quote from this person?

1st April is also called **April Fool's Day**. Find out what French children do on 1st April by researching **poisson d'avril**.

*Write down any 2 facts you learn about poisson d'avril.
* Write down a joke which you think will make your teacher laugh!
Can you illustrate your work?

www.sumdog.com
Use this website to improve your maths skills. Log-in using your username and password. Try the Multiplication Challenge which has been set to practise times tables facts.

French

Make a poster or game to help someone learn the French months of the year –
janvier, février, mars, avril, mai, juin, juillet, août, septembre, octobre, novembre, décembre.
Be prepared to share.

MUST DO TASK – Read every single day...share what you're reading with someone in your family.
You should aim to read for at least 10/15 minutes daily.

Are you an animal lover?
Investigate this site www.switchzoo.com.
You will find lots of information, activities, games and things to do.

***How did you feel about your homework? (colour in)**

***Parent signature (and comment, if needed):**
