

Time Grid

Time to think...

In your jotter, write down the following:
How many;-

- Seconds in a minute
- Minutes in an hour
- Hours in a day
- Days in a week
- Weeks in a year
- Months in a year

Time hunt

Go round your house and find all the different things that tell the time.

(Hint – almost anything electronic will have the time on it!)

Can you change the digital time to analogue time and the other way round?

AM/PM

When might we use the term “am” or “pm”? Write down all the hours in the day with am or pm after them.

Eg. 1 am, 2am, 3am...

Midnight and midday are a little bit tricky. Can you find out which one is am and which one is pm?

Calendar Challenge

Using a calendar, find all the dates of your families birthdays. This could include people you don't live with or even pets!

Leap Years

Do you know what year the most recent leap year was? Can you write down all the leap years for the last 20 years? What is different about a leap year?

Timetable

We use time for everything. Create a timetable of your day showing the different times you do things. (A bit like our visual timetable in class.)

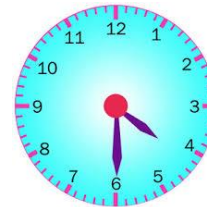

Quarter Past

Write down 5 different “quarter past” times in digital form. Can you change them to analogue form?

Half Past

Write down 5 different “half past” times in digital form. Can you change them to analogue form?

Quarter To

Write down 5 different “quarter to” times in digital form. Can you change them to analogue form?
