

Talking together

- * Show interest in your child's world (ask them to explain a game, describe their picture ...)
- * Help your child to talk about their feelings
- * Continue to speak your home language together
- * Talk to your child as you do daily activities (sorting laundry, cooking, washing up ...)
- * Introduce new words to your child and discuss the meanings

How do you feel about that?

What sounds can you hear in the house? What sounds can you hear outside? Are they the same or different?

Tell me about your picture?

We can speak our language together. Then you'll learn 2 languages. Isn't that clever!

That's an interesting word! I wonder what it means?

This will help your child to:

- * Learn to read and write
- * Feel confident and valued
- * Learn additional languages
- * Make friends
